Canadian Permanent Resident

Results-driven Senior Site Reliability Engineer & Solutions Engineer with 10+ years of progressive IT experience specializing in Observability, Monitoring, and DevOps/SRE practices. Proven expertise in managing enterprise-scale observability platforms (Splunk Cloud/ITSI Admin, Datadog, New Relic, Oracle O&M), implementing SLOs/SLIs and error budgets, and automating reliability workflows using Python and Terraform. Skilled in CI/CD, Infrastructure-as-Code, cloud platforms (AWS, GCP, OCI), and modern SRE methodologies. Adept at driving technical solutions, mentoring teams, and ensuring high system availability and cost-efficient monitoring strategies.

TECHNICAL PROFILE

AI & Automation

Cloud Platforms & Infrastructure

Container Orchestration

Observability & Monitoring

CI/CD & DevOps

Programming & Scripting

SRE Methodologies

Security & Networking

Collaboration & Integration

Vertex AI (GCP), N8N Workflow Automation.

GCP, Oracle Cloud Infrastructure, AWS, Kubernetes (GKE), Docker, Terraform, Linux, Windows

Kubernetes, Docker, Helm, GitOps, Container Security

Splunk Cloud/ITSI Admin, New Relic Admin, Oracle O&M, Datadog, Ops

Genie, Nagios, PagerDuty, Prometheus, Grafana, AWS CloudWatch,

APM, Synthetic Monitoring, Distributed Tracing

GitLab CI/CD, Ansible, JAMS

Python, Bash, Shell Scripting, SQL, HTML

Site Reliability Engineering (SRE), SLO/SLI Definition, Error Budgets,

Incident Management, Capacity Planning, Performance Engineering,

FinOps

Cloudflare, F5 Load Balancers

Service Now, BMC Remedy, Slack API, Jira, Confluence, API

Development, Webhook Integration

COMPETENCIES

- **SRE & Observability:** Expertise in Datadog, Splunk (ITSI, infra), New Relic, and other monitoring solutions; applied SRE practices (Golden Signals, SLOs, SLIs, error budgets) to ensure high availability and reliability.
- **Automation & DevOps:** Automated incident/change management, observability workflows, dashboards, and alerts using Python, AI workflows (n8n); skilled in CI/CD (Jenkins, GitHub), Kubernetes (GKE), Terraform
- **Cloud & Infrastructure:** Hands-on experience with GCP, Oracle Cloud, on-prem deployments, Kubernetes microservices, and cost optimization of monitoring platforms.
- **Leadership & Delivery:** Led cross-functional teams, drove client workshops/POCs, and scaled Oracle Cloud O&M adoption, increasing consumption by \$1M+.
- **ITSM & Production Support:** Strong background in incident, problem, and change management under ITIL practices, ensuring operational resilience and reduced MTTR.

PROFESSIONAL EXPERIENCE

Sep 2023 –

Present

Senior Site Reliability Engineer

Questrade, Toronto

Currently working as Senior Site Reliability Engineer where primary responsibilities are:

- **GCP Observability Platform Implementation:** Orchestrated end-to-end deployment of Datadog observability platform for GCP and Splunk using Terraform, automating the creation of 50+ monitors and dashboards tracking SLOs and SLIs across 17 engineering teams. Reduced mean time to detection (MTTD) by 35% and improved incident response efficiency.
- **FinOps Cloud Monitoring Dashboard:** Spearheaded the design and implementation of a comprehensive Grafana-Prometheus based FinOps dashboard to track and analyze cloud expenditure patterns. Enabled cost optimization initiatives that identified \$200K+ in annual savings opportunities through better resource utilization visibility.
- **Splunk Monitoring Setup:** Implemented monitoring of Linux and Windows based OnPrem Applications in **Splunk ITSI** and enabled monitoring integrations for **Salesforce, Genesys Cloud, and GKE microservice in Splunk Cloud**

- Managed **Datadog cost optimization, agent upgrades, synthetic workers, and APM** for performance visibility.
- Supported **Kubernetes workloads (GKE)**, on-prem, and **GCP deployments** as part of change management, handled **incidents, production support, and post-deployment monitoring**, ensuring smooth operations across critical systems
- **Agentic AI N8N Workflow Automation Platform:** Implemented Agentic AI n8n-based workflow automation platform for deployment processes and operational tasks. Created 20+ automation workflows that reduced manual deployment effort by 45% and standardized deployment procedures across teams.
- **Multi-Platform Maintenance Automation:** Architected and deployed Ansible-based automation framework integrated with JAMS scheduler for recurring maintenance tasks across 100+ Windows and Linux servers. Reduced maintenance window time by 70% and eliminated 95% of manual maintenance tasks
- **Automated Log Management Bot:** Engineered an intelligent Slack bot using python and Slack API to automate Datadog log ingestion, indexing, and retrieval. Reduced log search time by 60% and eliminated manual log access requests, saving 15+ engineering hours weekly across teams
- Helped Dev teams by **automating SRE implementation** for their services using Datadog, python including the improvements in incident and change management processes (rescheduling, cancellations, incident declaration, and reporting) using Python and AI workflows (n8n), reducing manual effort and MTTR.

**Jan 2022 –
Jul 2023**

Senior Solutions Engineer/Senior Data Engineer

Oracle, Bengaluru

- Driven Manageability products business across APAC region with primary area of focus on Oracle Cloud Observability and Management. Delivered POCs, RFPs, demos, workshops to customers for Oracle Cloud Observability.
- Experienced in DevOps that included working on GitHub, Kubernetes, CICD.
- Implemented Observability solutions on more than 25 customer environments.

**Nov 2019 –
Jan 2022**

Site Reliability Engineer

News Technology Services, Bengaluru

- Administered Splunk, New Relic, Nagios, and Devo, including agent upgrades and observability setup under ITIL practices (incident, problem, change management).
- Developed alerts, dashboards, and log validations in Splunk to optimize monitoring and accelerate troubleshooting. Configured New Relic synthetic monitors using Docker-based private minions, enhancing reliability testing. Automated monitoring tasks with Python health-check scripts synthetic monitor setups, reducing manual effort.
- Partnered with application owners to define thresholds, tune alerts, and strengthen observability coverage.

**May 2018–
Aug 2019**

IT Consulting Senior Consultant

NTT Data, Gurugram

Splunk Analyst Role

- **Architected and administered Splunk environments**, driving end-to-end data ingestion and visualization for enterprise applications.
- Developed **advanced queries, reports, dashboards, and alerts** to enable real-time monitoring and proactive issue detection.
- Onboarded multiple application log sources and used dynamic field extraction to enhance search efficiency and observability coverage.

**May 2017–
Apr 2018**

Splunk Analyst

Wells Fargo, Bengaluru

Splunk Admin Role

- Developed advanced Splunk dashboards, reports, and alerts providing actionable insights and improving monitoring coverage.
- Executed Splunk maintenance, deployments, and issue resolution, ensuring stable and optimized platform performance.
- Managed incidents, problems, & change requests reducing operational risk and downtime.

**Oct 2014 –
Apr 2017**

Splunk Admin/Developer

Accenture, Bengaluru

Splunk Admin/Developer Role

- Managing Indexers, Forwarders, Index management, and importing data in Splunk. Built advanced Splunk dashboards, queries, and alerts, enabling faster incident detection and

root cause analysis. Administered indexers, forwarders, & log ingestion, improving data reliability & system performance.

- Supported critical applications (Tomcat, UNIX, Splunk) with 99.9%+ uptime, reducing MTTR through proactive monitoring and IBM Thread Dump Analyzer. Coordinated releases, server maintenance, and deployments, ensuring smooth production rollouts with minimal downtime.

EDUCATION

Master Of Technology in Data Science, BITS Pilani - Bengaluru, India

Bachelor Of Technology in ECE, Graphic Era University - Dehradun, India

CERTIFICATION

April 2025 Hashi Corp Terraform Associate (003)

Mar 2023 Oracle Cloud Infrastructure Data Science 2022 Certified Professional

Jan 2023 Oracle Cloud Infrastructure 2022 Observability and Management Certified Professional

Apr 2022 Oracle Cloud Infrastructure 2021 Certified Architect Associate

Sept 2021 ITIL® v4 Foundation Certificate in IT Service Management

May 2020 New Relic Performance Monitoring Fundamentals

Jan 2017 Splunk Certified Admin, Certified Power User, Splunk Certified Advanced Dashboards & Visualization
